SERVICES

Since 2003

01

PRE ANTI TERMITES TREATMENT

Pre Anti Termites Treatment Services:

The most effective technique to avoid termite attack in buildings or residences is to apply anti-termite treatment before to construction. Chemicals are used to treat the soil beneath the foundation. To keep termites out of the structure, a chemical barrier is created between the ground and the foundation brickwork.

02

POST ANTI TERMITE TREATMENT

Post Anti Termite Treatment:

Post construction anti termite treatment is a termite control technology used on a structure that is ready for occupancy or a home that has already been occupied. When pest invaders assault through surface soil and spread within the building in search of food, this strategy is used.

03

Since 2003

VECTOR CONTROL TREATMENT

Vector Control Treatment:

Vector control is a highly effective way to reduce malaria transmission and is a vital component of malaria control and elimination strategies. WHO currently recommends deployment of either insecticide-treated nets (ITNs) or indoor residual spraying (IRS) for malaria vector control in most areas at risk of malaria.

04

MOSQUITO PEST MANAGEMENT

Mosquitoes Pest Management Service:

Mosquito-borne diseases are those spread by the bite of an infected mosquito. Diseases that are spread to people by mosquitoes include Zika virus, West Nile virus, Chikungunya virus, dengue, and malaria. Employers should protect workers and workers should protect themselves from diseases spread by mosquitoes. 1. The fogging procedures intend to knock down or kill mosquitoes using a synthetic pyrethroid, 2. Cold Fogging is the one of the most latest techniques which kills mosquitoes without disturbing environment and humans health.

05

Since 2003

GENERAL PEST MANAGEMENT

General Pest Management Services:

Spraying & Gel Treatment - the most cost-effective type of treatment for general pest. It consists of spraying in all the walls, corners, cracks and crevices of a property using solutions that have a residual effect. This means that crawling insects that comes in contact of any treated area will be affected by the solution

06

RODENT PEST MANAGEMENT

Rodent Pest Management Services:

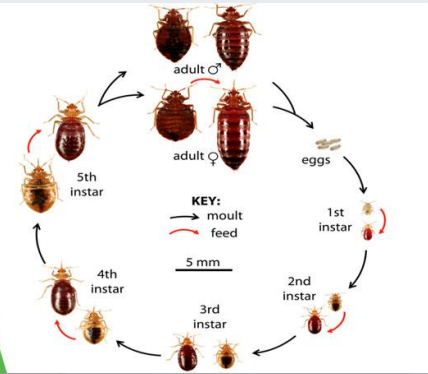

Preventing and treating rodent infestations requires a combination of eliminating access points rats and mice might use to enter your home, removing food sources and shelter that attract rodents, and using traps and baiting methods to get rid of existing rats and mice in or around your home/societies/offices.

07

Since 2003

BEDBUG PEST MANAGEMENT

Bedbug Pest Management Services:

Bed bugs are a public health pest. While bed bugs have not been shown to transmit disease, they do cause a variety of negative physical health, mental health and economic consequences. Some of these effects include: Allergic reactions to their bites, which can be severe.

08

WOOD BORER PEST MANAGEMENT

Wood Borer Pest Management Services:

Wood borers are insects that attack and cause serious damage to the wooden structure and furniture of a property. Properties constructed with natural wood are at high risk of wood borer attacks. [Wood-boring beetles](#), like Auger, Jewel, Stag, and Pinhole Borers etc. are called “Wood Borers”.

09

Snake Repellent

Snake Repellent:

Snakes are generally shy animals who want nothing to do with people. They can be beneficial because they eat mice, slugs, grubs, insects, and other pests and they can be food for other wildlife such as hawks. Although most species of snakes in North America are harmless, there are some venomous species that can pose risks to people and pets. Snakes enter areas inhabited by people in search of food and shelter. The easiest thing you can do is make your home and yard less appealing to them. Prevent snake problems by removing their food sources like rodents. Don't leave pet food out and store animal feed in tight containers.

Solution: We will provide Snake Repellent Services wherever is require.

10

Bird Prevention Netting System

Bird Prevention Netting System:

Bird control is important because pest birds can create health-related problems through their feces, including histoplasmosis, cryptococcosis, and psittacosis. Bird droppings may also cause damage to property and equipment.

Solution: Bird control devices fall under two categories: Bird Spikes and Bird Netting. Bird Spikes, discourage birds from landing or roosting in an area by presenting a physical obstacle or causing discomfort and annoyance for the target bird. Bird Netting are 100% effective when installed correctly, as they entirely prevent birds from physically entering the treated area.

11

Rat Guard Providing & Fixing Service

Rat Guard Providing & Fixing Service:

Rodents have tendency to climb wall in search of food with the support of pipes. Basic idea of fixing rat guards is to avoid rats to climb upstairs with the support of pipe.

Solution: Rat guards are metal sheets in conical shape which are fixed on the pipe's drainage, water, gas & cables.

12

Rat Bait Station Product:

Specially, designed to trap rats and use poison baits for the rats safely.

Solution: Rat Bait Station Installation, approved by WHO and others.

Important information:

1. Kindly note that your establishment has been registered with the EPFO on the basis of your declaration that the Act does not apply on your establishment and that you and majority of your employees agree that the Employees' Provident Funds and Miscellaneous Provisions Act, 1952 (herein after referred as the Act) should be applied to your establishment.

However, by virtue of the sections 1(3)(a) and 1(3)(b) of the Act, it applies on an establishment on its own volition. In case it is discovered so, at any later stage, you, as an employer, are required to comply with the provisions of the Act accordingly. The obligations/duties/responsibilities cast upon you as an employer of this establishment and penalties, on account of non-compliance with the same, are explained on our website www.epfindia.gov.in and there is a link on ECR portal also for the same. You are required to go through them carefully.

A Starter's Kit for compliance under the Act is available for download from the ECR portal a link to which is provided from the epfindia.gov.in home page.

2. Remittance of dues under the provisions of the Act is to be made only through a Challan generated through the ECR (Electronic Challan cum Return) portal. (The process for registration on the portal, preparation of the ECR txt file and related information is available on the website and the portal).

3. In case this letter is produced as a proof of the registration of the establishment, before any person including any Inspector from EPFO, the Form 5A generated through the portal at the time of registration should be a part of this letter. The remittance details of the establishment will be available on the EPFO website through the link "Establishment Search" where from March 2012 wages onwards, all payments with the names of employees are available on the link in cases of remittances made after uploading the ECR.

4. Please quote the Code Number for all the future correspondence with EPFO.

This is a system generated letter and needs no signature.
